What is the safest way to answer your door when you have a visitor?

How do you answer your door? Open the door with the chain lock and peek out? Look through the “peep hole” and talk through the door? You risk being a victim of a burglary when you open your front door!

The best way is to answer safely from another room! The visitor rings the doorbell and you are notified with a door chime. Simply press a button on the color monitor and speak hands-free safely with the visitor.

They do not see you but you see them clearly, night or day allowing you to decide safely to open the door. Push one button on the monitor and send a signal to unlock the door which is great for a small office or school district. Also with a “wired” system you don’t have to worry about an internet connection.

Upgrade Your Security with the **MyDoor™ Wireless IP Video Doorbell** featuring an exclusive adjustable camera with Night-Vision and no monthly fees.

MyDoor™ Front Door IP Camera

Upgrade your security with the MyDoor™ Wireless IP Video Doorbell, featuring an exclusive adjustable camera with Night-Vision and no monthly fees.

- Standard: PAL/NTSC
- Uses 4 conductor 22 awg wiring
- Calling time: 120s.
- Current: Standby Maximum 150MA, Work current Maximum 600MA
- Separate power supply
- Work temperature: -10 °C ~+ 60 °C
- Housing is weather resistant, theft-proof and surface-mounted
- Built-in storage: Yes

Wired Security Cameras

Wired is a great way to have security because you do NOT have to rely on an internet connection to answer your front door securely.

VIDOOR

The door camera has LEDs for night vision and selectable door chimes. Its stainless steel-like finish includes an anti-vandalism and rainproof guard. Visitor presses the button which rings the pre-selected doorbell chime then enables hands-free communication with indoor monitors.

- 1/3 Sony CCD 420TVL
- Fixed lens 3.6mm
- 0.01 LUX
- Housing is weather-resistant, theft-proof, and surface-mounted
- White LED night vision for clear image in low or no light condition
- Included with the V304KIT and compatible with the V18 Monitor/V18 Monitor-R
- Uses 4 conductor 22 awg wiring

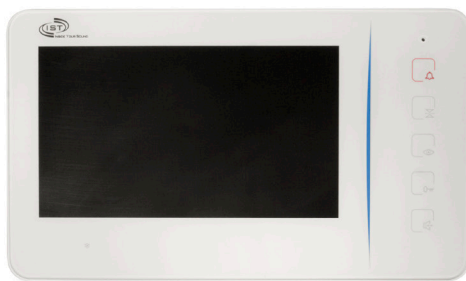

Access Entry with a Key Fob

Add even more security to your video monitoring system by including a camera with Access Control. This is a great fit for small businesses that use access control for an employee entrance

VIDOOR-K

The key fob lets you open the door by waving the fob within 2 inches of the camera, sending a signal to a magnetic lock.

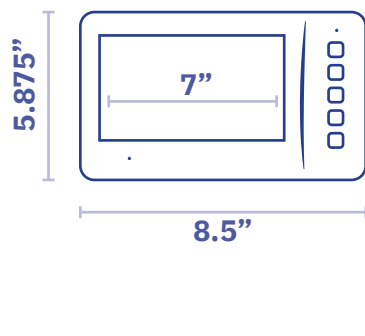

- 1/3 Sony CCD 420TVL
- Fixed lens 2.5mm
- 0.01 LUX
- Hands-free & touch-button design
- More than 10 chimes for ring selections
- Housing is weather-resistant, theft-proof, and surface-mounted
- White LED night vision for clear image in low or no light conditions
- 2 key fobs included: 1 master, 1 entry (*additional key fobs available, unlimited amount usable on one camera*)
- Privacy/Do Not Disturb
- Compatible with the V18 Monitor/V18 Monitor-R
- Uses 4 conductor 22 awg wiring

Wired Security Monitors

Wired security monitors are great for residential or office use. This video monitor has a color 7" inch LCD screen with adjustable brightness, contrast, and speech volume. The surface-mounted white faceplate boasts a low profile, standing out only 7/8" inch from the wall. Indoor monitors are available to call and transfer calling each other.

**V18 Monitor
Dimensions**

V Stand

V18 MONITOR

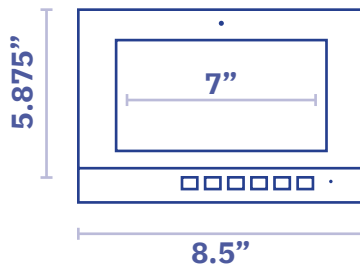

- 400 feet total distance for all connected devices, 100 feet limitation between each device when using CAT5
- Display: 7" TFT-LCD (Color)
- Resolution: 1440X234 pixel (Color)
- Video input: 1VP-P/75Ω
- Audio SNR: $\geq 25\text{dB}$
- Audio Distortion: $\leq 7\%$
- Static Current: $\leq 60\text{mA}$
- Working Current: $\leq 500\text{mA}$
- Power Supply: $\text{DC}18\text{V} \pm 10\%$
